Subject: NOTICE OF OPERATION -Pursuant to CFR Title 43
Paragraph 3809.1-3, Notice-disturbance of 5
acres or less

Dear Mr. Berggren:

This letter is to provide notice to the Bureau of Land Management of planned mining operations and includes below the information and statements required in the cited Title 43.

1. The claimant of the property is FELLER HOLDING CORPORATION, whose address is 1051 North 1100 West, St. George, Utah 84770.
The operator of the property is FELLER STONE INC., whose address is 1051 North 1100 West St. George, Utah 84770.
2. The placer mining claims included in this notice are:
TJKSJ, TJKSJ # 1, 2 and 3, Placer Mining Claims, UMC # (Not yet assigned). Located in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ and the S $\frac{1}{2}$ SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 28, and in the S $\frac{1}{2}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 27, T. 40 S., R. 16 W., SLB&M.
3. Initial mining activity will be conducted along the outcrop of gypsum deposits exposed by previous mining operations. The outcrop extends roughly along the 4800 foot contour line in the claim group. See enclosed Veyo, Utah topographic map.

Mining will be conducted on an as needed basis. An estimated production of 100 to 500 tons per year is scheduled in the years of mining. Mining will be accomplished by drilling and blasting rock in place then loading it onto dump trucks for shipment from the mine. As there is a large face of ore, it appears that circa 2 acres will be used at the mine. Access to the property is from existing roads and trails.

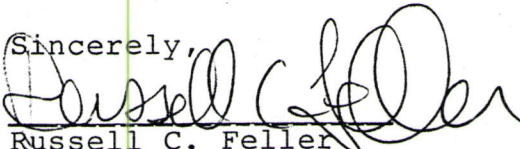

4. Planed reclamation for the disturbed mine area and any new access roads that may be required will be accomplished at the end of the mining operation in circa 25 to 30 years. Reasonable measures will be taken to prevent unnecessary or undue degradation of federal lands during this mining operation.

Access routes are existing roads or trails and they will be maintained to a minimum width needed for the operation and will follow the existing contours where practicable. It is anticipated that there will be some removal of overburden to advance some of the mining faces.

Reclamation measures will include saving the top-soil for final application on disturbed areas after reshaping. As the mine area is limited mitigating measures to prevent landslides and erosion will be minimal. Present plans do no envision the need for or storage of toxic material on the project. The mine will not disturb any known fisheries and the reclaimed mine will restore any disturbed wildlife habitat.

Notification will be made to the authorized officer upon completion of mining and the reclamation of the site.

Sincerely,

A handwritten signature in dark ink, appearing to read "Russell C. Feller", written over a horizontal line.

Russell C. Feller
President, Feller Holding Corporation
